Pass Status: Pass

Required Score: 100%

Task Summary**Required Actions**

- ✓ Use `ipconfig /all` on Office2 to get the IP and MAC addresses
- ✓ Spoof the MAC address of ITAdmin
- ✓ Update the IP address on ITAdmin

Explanation

In this lab, your task is to complete the following:

- On Office2 use **ipconfig /all** and find the IP address and MAC address.
- Spoof the MAC address on ITAdmin to that of Office2 using SMAC.
- Refresh your MAC and IP addresses to match the target machine.

Complete this lab as follows:

1. Find the IP address and MAC address as follows:
 - a. Right-click **Start** and select **Windows PowerShell (Admin)**.
 - b. At the command prompt, type **ipconfig /all** and press **Enter**.
 - c. Find the **MAC address** and the **IP address**.
2. Spoof the MAC address as follows:
 - a. From the top navigation tabs, select **Floor 1 Overview**.
 - b. Under IT Administration, select **ITAdmin**.
 - c. In the search bar, type **SMAC**.
 - d. Under Best match, right-click **SMAC** and select **Run as administrator**.
 - e. In the New Spoofed Mac Address field, type **00:00:55:55:44:15** for the MAC address from Office2.
 - f. Select **Update MAC**.
 - g. Select **OK** to restart the adapter.
3. Refresh your MAC and IP addresses as follows:
 - a. Right-click **Start** and select **Windows PowerShell (Admin)**.
 - b. At the command prompt, type **ipconfig /all** to confirm the MAC address has been updated.
 - c. Type **ipconfig /renew** to update the IP address.
