**Task Summary****Required Actions**

- ✓ Disable all audit policies

**Explanation**

In this lab, your task is to use Windows PowerShell (as Admin) to:

- View the current audit policies on the system.
- Disable all audit policies.
- Confirm that all the audits were disabled.

Complete this lab as follows:

1. Right-click **Start** and select **Windows PowerShell (Admin)**.
2. Maximize the window for easier viewing.
3. At the command prompt, type **auditpol /get /category:\*** and press **Enter** to view the current audit policies.  
Notice the different settings used for each system.
4. Type **auditpol /clear /y** and press **Enter** to disable all audit policies.
5. Type **auditpol /get /category:\*** and press **Enter** to confirm that the audits were disabled.  
Notice that all of the policies are now set to No Auditing.
