Task Summary

Actions you were required to perform:

- ✓ Enable VT support in the BIOS on Office1

Explanation

In this lab, your task is to complete the following:

- Restart the computer.
- As the computer boots, press **F2** to enter the BIOS configuration utility.
- Enable VT.
- Save your changes.
- Restart the computer to verify the changes you have made.

Complete this lab as follows:

1. Select **Start**.
2. Select **Power**.
3. Select **Restart**.
4. When you see the BIOS loading screen, press **F2** to enter the BIOS.
5. In the left pane, expand **Virtualization Support**.
6. Select **Virtualization**.
7. Select **Enable Intel Virtualization Technology**.
8. Select **Apply** to save the changes.
9. Select **Exit**. The system reboots.
