Task Summary

Actions you were required to perform:

- ✓ Start the enp2s1 network interface card

Explanation

In this lab, your task is to complete the following:

- Determine which network interface went down when it was unplugged.
- Start the network interface from the command line.

Complete this lab as follows:

1. At the prompt, type any of the following **commands** and press **Enter** to view information about the network interfaces to determine which card is not up and to identify the card alias. (The alias for the network interface that is down is enp2s1.)
 - **ip addr**
 - **ip addr show**
 - **ip addr show enp2s1**
 - **ifconfig -a**
2. Type either of the following **commands** and press **Enter** to start the enp2s1 network interface:
 - **ifup enp2s1**
 - **ip link set enp2s1 up**
