- ✓ Add the read other permission for /sales/goals
- ✓ Add the read other permission for /sales/orders
- ✓ Add the read other permission for /sales/products
- ✓ Add the read other permission for /sales/stats

Explanation

In this lab, your task is to complete the following:

- Allow the other group to browse the /sales directory.
- Modify permissions on all files in the /sales directory to allow members of the other group to view the file, but prohibit them from making changes to it.

Complete this lab as follows:

1. At the command prompt, type **chmod o+rx /sales** and press **Enter** to enable the other group to browse the /sales directory. The read and execute permissions are necessary to see the directory and list its contents.
2. Type **chmod o+r /sales/*** and press **Enter** to allow the other group to read all documents in the /sales directory.
