Task Summary

 Create the Domain Controllers computer group [Hide Details](#)

-  Create the computer group
-  Make CorpDC a member of the group
-  Make CorpDC2 a member of the group
-  Make BranchDC1 a member of the group
-  Make BranchDC2 a member of the group

 Create the Servers computer group [Hide Details](#)

-  Create the computer group
-  Make CorpWeb a member of the group
-  Make CorpFiles12 a member of the group
-  Make CorpFiles16 a member of the group
-  Make CorpDHCP a member of the group
-  Make CorpServer a member of the group

 Create the Workstations computer group [Hide Details](#)

-  Create the computer group
-  Make Exec a member of the group
-  Make ITAdmin a member of the group
-  Make Office1 a member of the group
-  Make Office2 a member of the group
-  Make Support a member of the group

Explanation

In this lab, you create the following computer groups on CorpWSUS1 and add members to them as follows:

Computer Group	Members
Domain Controllers	CorpDC CorpDC2 BranchDC1 BranchDC2
Servers	CorpWeb CorpFiles12 CorpFiles16 CorpDHCP CorpServer
Workstations	Exec

	ITAdmin Office1 Office2 Support
--	--

Complete this lab as follows:

1. From Hyper-V Manager, select **CORPSERVER**.
2. Maximize the window to view all virtual machines.
3. Right-click **CorpWSUS1** and select **Connect**.
4. From Server Manager, select **Tools > Windows Server Update Services**.
5. In the left pane, expand the **CorpWSUS1 > Computers**.
6. Create a computer group as follows:
 - a. Right-click **All Computers** and select **Add Computer Group**.
 - b. Type the *computer group name*.
 - c. Select **Add**.
 - d. Repeat step 6 for additional computer groups.
7. Assign computers to a group as follows:
 - a. Select **Unassigned Computers**.
 - b. In the middle pane, right-click a *computer* (or multiple selected computers) and select **Change Membership**.
 - c. Select the *group* to which the computer will belong.
 - d. Click **OK**.
 - e. Repeat step 7 to assign additional computers.
