- ✚ Plugged In:
  - ✚ Never turn off the display
  - ✚ Never put the computer to sleep

- ✓ Configure advanced plan settingsHide Details

- ✚ On Battery:
  - ✚ Turn off the hard disk after 15 minutes
  - ✚ Hibernate the computer when low battery is reached
- ✚ Plugged in: Turn off the hard disk after 0 minutes (never)

- ✓ Make the Presentation plan the current plan

## Explanation

In this lab, your task is to complete the following:

- Create a custom power plan called Presentation based on the Balanced plan as follows:

Settings	On Battery	Plugged In
Turn off the display after	1 hour	Never
Put the computer to sleep after	2 hours	Never
Turn off the hard disk after	15 min	Never (use 0)
Low battery action	Hibernate	Do nothing

- Make the new power plan the current plan.

Complete this lab as follows:

1. Create a custom power plan as follows:

- a. Select **Start**.
  - b. Select **Settings**.
  - c. Maximize the window for easier viewing.
  - d. Select **System**.
  - e. From the left menu, select **Power & sleep**.
  - f. Under Related settings, select **Additional power settings**.
  - g. On the left, select **Create a power plan**.
  - h. Make sure **Balanced** is selected.
  - i. In the Plan name field, enter **Presentation**.
  - j. Click **Next**.
  - k. From the Turn off the display drop-down list, select **1 hour** for On battery.
  - l. From the Turn off the display drop-down list, select **Never** for Plugged in.
  - m. From the Put the computer to sleep drop-down list, select **2 hours** for On battery.
  - n. From the Put the computer to sleep drop-down list, select **Never** for Plugged in.
  - o. Click **Create**.
2. Modify the Presentation power plan settings as follows:
  - a. To the right of Presentation, select **Change plan settings**.
  - b. Select **Change advanced power settings**.
  - c. Expand **Hard disk**.
  - d. Expand **Turn off the hard disk after**.
  - e. Select **On battery**.
  - f. In the On battery field, enter **15**.
  - g. Select **Plugged in**.
  - h. In the Plugged in field, enter **0**.
  - i. Expand **Battery**.
  - j. Expand **Low battery action**.
  - k. From the On battery drop-down list, select **Hibernate**.
  - l. Select **Plugged in**.
  - m. From the Plugged in drop-down list, make sure **Do nothing** is selected.
  - n. Click **OK**.
