☐ Idle Timeout: 15 minutes

✖ Deny login from the WAN interface [Hide Details](#)

☐ Deny WAN login for xAdmin

☐ Deny WAN login for mbrown

✖ Restrict login for xAdmin to 192.168.0.10

✖ Restrict login for mbrown to 192.168.0.21

Explanation

In this lab, your task is to perform the following:

- Rename the default user account (**cisco**) with the following parameters:
 - User name: **xAdmin**
 - Password: **Admin\$0nly** (0 = zero)
 - Idle timeout: **15 minutes**
 - Set for LAN access only (no WAN access)
 - Allow access only from CorpServer (192.168.0.10)
- Create a new administrative user with the following parameters:
 - User name: **mbrown**
 - First name: **Mary**
 - Last name: **Brown**
 - User type: **Administrator**
 - Password: **St@y0ut!** (0 = zero)
 - Idle timeout: **15 minutes**
 - Set for LAN access only (no WAN access)
 - Allow access only from the administrator's workstation (192.168.0.21)

Complete this lab as follows:

1. Select **Start**.

2. Select **Windows Accessories**.
3. Select **Internet Explorer**.
4. In the URL field, type **198.28.56.18** and press **Enter**.
5. In the Username field, enter **cisco**.
6. In the Password field, enter **cisco** to log in to the Security Appliance Configuration utility.
7. Select **Log In**.
8. Rename the default user account as follows:
 - a. From the Getting Started (Basic) page, select **Change Default Admin Password and Add Users**.
 - b. Select **Edit** for the cisco username.
 - c. In the User Name field, enter the new **username**.
 - d. Select **Check to Edit Password**.
 - e. Enter the current logged in administrator **password**.
 - f. Enter the new **password**.
 - g. Re-enter the new **password** to confirm the new password.
 - h. Enter the **idle timeout**; then click **Apply**.
9. Create a new administrative user as follows:
 - a. Select **Add** to add another user.
 - b. In the User Name field, enter the **username**.
 - c. Enter the **first name**.
 - d. Enter the **last name**.
 - e. From the User Type drop-down list, select **Administrator**.
 - f. Enter the **password**.
 - g. Re-enter the **password** to confirm the new password.
 - h. Enter the **idle timeout**; then click **Apply**.
10. Edit user policies as follows:
 - a. Under Edit User Policies, select **Login** to configure a login policy.
 - b. Select **Deny Login from WAN Interface**; then click **Apply**.
 - c. Repeat steps 10a–10b for the other user.
11. Define network access as follows:
 - a. Under Edit User Policies, select **By IP** to configure IP address restrictions for login.
 - b. Select **Add**.
 - c. In the Source Address Type field, make sure **IP Address** is selected.
 - d. In the Network Address/IP Address field, enter the appropriate **IP address**; then click **Apply**.
 - e. Select **Allow Login only from Defined Addresses**.
 - f. Click **Apply** to close the dialog.
 - g. Repeat steps 11a–11f for the other user.
