Task Summary

- ✔ Create the Test1.vhd virtual disk [Show Details](#)
- ✔ Create the Test2.vhdx virtual disk [Show Details](#)

Explanation

In this lab, you create two virtual hard disks using the following settings:

Virtual Disk	Disk Format	Disk Type	File Name	Size
Test1	VHD	Fixed size	Test1.vhd	500 GB
Test2	VHDX	Dynamically expanding	Test2.vhdx	4096 GB

To create virtual hard disks, complete the following for each virtual hard disk:

1. From Server Manager, select **Tools > Hyper-V Manager**.
2. Right-click **CORPSEVER** and select **New > Hard Disk**.
3. In the Before You Begin window, select **Next**.
4. Select the ***disk format***; then click **Next**.
5. Select the ***disk type***; then click **Next**.
6. In the Name field, enter the ***name*** of the virtual hard disk file.
7. In the Location field, enter the ***location*** of the virtual hard disk file; then click **Next**.
8. In the Size field, enter the ***size*** of the new virtual disk; then click **Next**.
9. Click **Finish**.
10. Repeat steps 2-9 to create the second virtual disk.

The Disk Management utility can be used to create virtual disks. However, this lab is designed to only use Hyper-V Manager to create the virtual disks
