Task Summary

- ✖ Convert the sales.private zone to an Active Directory-integrated zone
- ✖ Replicate zone data with all DNS servers in the domain

Explanation

In this lab, you perform the following tasks:

- Convert the **sales.private** zone to an Active Directory-integrated zone.
- Change the replication scope to store data on all DNS servers in the domain.

Complete this lab as follows:

1. In Hyper-V Manager, select **CORPSEVER**.
2. Right-click **CorpDC** and select **Connect**.
3. In Server Manager, select **Tools > DNS**.
4. Expand **CORPDC**.
5. Expand **Forward Lookup Zones**.
6. Right-click the **zone** and select **Properties**.
7. Under Type, select **Change**.
8. Make sure that **Primary zone** is selected.
9. Select **Store the zone in Active Directory**.
10. Select **OK**.
11. Select **Yes** to confirm Active Directory integration.
12. Under Replication, select **Change**.
13. Select **To all DNS servers in this domain**.
14. Click **OK**.
15. Click **Yes** to confirm your changes.
16. Click **OK**.
