## Individual Responses

▼ Question 1: Correct

While using a new Windows system, you find that the mouse pointer tracks much more slowly on the screen than you would prefer. You want to increase the mouse pointer speed.

Click the tab you would use in the Mouse Properties window to do this.

## Explanation

Mouse properties can be set in Control Panel by going to Hardware and Sound > Devices and Printers > Mouse. You use the Pointer Options tab to configure the pointer speed, snap-to, and visibility settings.

The Buttons tab configures the button configuration, double-click speed, and ClickLock settings. The Pointers tab configures the pointer scheme. The Wheel tab configures vertical and horizontal scrolling settings. The Hardware tab is used to configure driver settings.

▼ Question 2: Incorrect

While using a new Windows system, you find that the double-click speed setting on the mouse pointer is set much slower than you would prefer. You want to increase the double-click speed setting.

Click the tab you would use in the Mouse Properties window to do this.

## Explanation

Mouse properties can be set in Control Panel by going to Hardware and Sound > Devices and Printers > Mouse. You use the Pointer Options tab to configure the pointer speed, snap-to, and visibility settings.

You use the Pointer Options tab to configure the pointer speed, snap-to, and visibility settings. The Pointers tab configures the pointer scheme. The Wheel tab configures vertical and horizontal scrolling settings. The Hardware tab is used to configure driver settings.

### ▼ Question 3: Incorrect

Which category can you use in Control Panel to control how times, dates, numbers, and currency are formatted and displayed for your computer?

- ➡ ☐ Clock and Region
- ☐ Administrative Tools
- ☐ Appearance and Personalization
- ☒ ~~Advanced System Settings~~

## Explanation

Use the Clock and Region option in Control Panel to control how times, dates, numbers, and currency are formatted and displayed and to manage language capabilities for your system.

Use Administrative Tools to access MMC consoles such as Services and Computer Management. Use Advanced System Settings to access Device Manager and configure remote access settings. Use Appearance and Personalization to configure the desktop theme.

### ▼ Question 4: Incorrect

You use your computer to type documents in Portuguese that will be sent to Brazil. You purchase a second keyboard designed specifically for Portuguese.

Which Windows setting would you use to configure your computer for the new keyboard so you can switch between the Portuguese and English keyboards?

- ➡ ☐ Time & Language
- ☐ Personalization
- ☒ ~~Devices~~
- ☐ Apps

## Explanation

Use the Time & Language option in Windows Settings to manage language support for your system. An input language identifies the language, font, and keyboard layouts that can be used on the system.

Use Devices to configure hardware, such as adding a new printer. Use Apps to install and uninstall Apps on your system. Use Appearance and Personalization to manage backgrounds and the desktop theme.

## ▼ Question 5:

Incorrect

You have a Windows system shared by three shift workers. Files that are used by all users are stored on the D:\ drive in various folders. The users have created hundreds of files on this drive and sometimes experience difficulty finding the files they need.

What should you do?

- ☐ Configure Work Folders for the folders on the D:\ drive.
- ☒ ~~Add an additional drive to the system and configure a new Storage Space using the files from the old D:\ drive.~~
-  ☐ Configure indexing to include the D:\ drive.
- ☐ Configure visual settings to optimize performance.

### Explanation

The Windows file search tool runs relatively quickly because it does not search the entire storage device. Instead, it searches for a file within an index that is maintained by the operating system. You can use the indexing options in Control Panel to customize which file locations are included in the index.

Storage Spaces are used to pool available storage space from multiple storage devices in the system. Use Work Folders to make files on the system available across all devices used by users, even when the system is offline. Visual effects controls how window contents and fonts appear on the screen.
