Elapsed Time: 2 minutes 28 seconds

Pass Status: Not Passed

Required Score: 100%

### Task Summary

- ✗ Create the Default Rules [Show Details](#)
- ✗ Configure a Publisher rule to allow for future updates from the same vendor
- ✗ Allow the support group to run the Call Center software

### Explanation

In this lab, you\ configure AppLocker in the WorkstationGPO on CorpDC using the following parameters:

- Create default executable rules to ensure you maintain access to the following files:
  - All files located in the Program Files folder
  - All files located in the Windows folder
- Configure a Publisher rule to allow for future updates from the same vendor.
- Allow the support group to run the call center software.
- Do not add exclusions to the rule.

Configure AppLocker as follows:

1. From Hyper-V Manager, select **CORPSERVER**.
2. Right-click **CorpDC** and select **Connect**.
3. From Server Manager on CorpDC, select **Tools > Group Policy Management**.
4. Expand **Forest:CorpNet.com > Domains > CorpNet.com > Group Policy Objects**.
5. Right-click **WorkstationGPO** and select **Edit**.
6. Under Computer Configuration, expand **Policies > Windows Settings > Security Settings > Application Control Policies**.
7. Select **AppLocker**.
8. In the right pane, select **Configure rule enforcement**.
9. Under Executable rules, select **Configured**.
10. Make sure **Enforce rules** appears in the drop-down list.
11. Click **OK**.
12. Create default executable rules as follows:
  - a. In the left pane, expand **AppLocker**.
  - b. Right-click **Executable Rules** and select **Create Default Rules**.
  - c. In the right pane, notice that the three default executable rules that allow Everyone access to the Windows and Program Files directories were created.
13. Configure a Publisher rule and allow the Support group to run the call center software as follows:
  - a. Right-click **Executable Rules** and select **Create New Rule**.
  - b. Click **Next**.
  - c. Make sure **Allow** is selected; then click **Select**.
  - d. Enter the **name** of the required group; then click **OK**.
  - e. Click **Next**.
  - f. Make sure **Publisher** is selected; then click **Next**.
  - g. Select **Browse**.
  - h. Browse to and select the **executable file**.
  - i. Select **Open**.
  - j. Slide the pointer from File version to **Publisher**; then click **Next**.
  - k. Click **Next**.

- l. Accept the *default name* and select **Create**.
- m. Notice that the Publisher rule was created.
