-  Items to back up: System State and C: drive
-  Backup location: \\CorpFiles12\Backup

Explanation

Use Windows Server Backup to create a schedule and to back up a server.

- Use Backup Schedule to set a daily schedule for regular backups.
- Use Backup Once to perform an immediate backup.

Complete this lab as follows:

1. Create a backup schedule as follows:
 - a. From Hyper-V Manager, select **CORPSERVER2**.
 - b. Expand the Hyper-V window to view all virtual machines.
 - c. Right-click the **CorpDC4** server and select **Connect**.
 - d. From Server Manager, select **Tools > Windows Server Backup**.
 - e. Maximize the window for easier viewing.
 - f. In the Console Tree, select **Local Backup**.
 - g. In the Actions pane, select **Backup Schedule**.
 - h. Click **Next** to begin the wizard.
 - i. In the Select Backup Configuration window, select **Custom**; then click **Next**.
 - j. Select **Add items**.
 - k. Select the **items** to include in the backup; then click **OK**.
 - l. Click **Next**.
 - m. Select the **backup frequency**.
 - n. Select the **backup time**; then click **Next**.
 - o. Select **Back up to a shared network folder**; then click **Next**.
 - p. Click **OK**.
 - q. Enter the **location** of the shared folder; then click **Next**.
 - r. Click **Finish**.
 - s. Click **Close**.
2. Perform a backup once as follows:
 - a. From Windows Server Backup Actions, select **Backup Once** in the right pane.
 - b. In the Backup Options window, select **Different options**; then click **Next**.
 - c. In the Select Backup Configuration window, select **Custom**; then click **Next**.
 - d. Select **Add items**.
 - e. Select the **items** to include in the backup; then click **OK**.
 - f. Click **Next**.
 - g. Select **Remote shared folder**; then select **Next**.
 - h. In the Location field, enter the **backup location**; then click **Next**.

- i. Select **Backup** to start the backup.
- j. After the backup is finished, click **Close**.
