- ✓ Virtualize file and registry write failures to per-user locations: Enabled

Explanation

In this lab, you configure the following UAC settings in the Default Domain Policy on CorpDC:

| User Account Control | Setting |
|--|---------------------------------------|
| Admin Approval Mode for the Built-in Administrator account | Enabled |
| Allow UIAccess applications to prompt for elevation without using the secure desktop | Disabled |
| Behavior of the elevation prompt for administrators in Admin Approval mode | Prompt for credentials |
| Behavior of the elevation prompt for standard users | Automatically deny elevation requests |
| Detect application installations and prompt for elevation | Enabled |
| Only elevate UIAccess applications that are installed in secure locations | Enabled |
| Only elevate executables that are signed and validated | Disabled |
| Run all administrators in Admin Approval Mode | Enabled |
| Switch to the secure desktop when prompting for elevation | Enabled |
| Virtualize file and registry write failures to per-user locations | Enabled |

Complete this lab as follows:

1. From Hyper-V Manager, select **CORPSERVER**.
2. Right-click **CorpDC** and select **Connect**.
3. From Server Manager, select **Tools > Group Policy Management**.
4. Expand **Forest: CorpNet.com > Domains > CorpNet.com**.
5. Right-click **Default Domain Policy** and select **Edit**.

6. Under Computer Configuration, expand **Policies > Windows Settings > Security Settings > Local Policies**.
7. Select **Security Options Policy**.
8. In the right pane, right-click the *policy* you want to edit and select **Properties**.
9. Select **Define this policy setting**.
10. Select **Enable** or **Disable** as necessary.
11. Edit the *value* for the policy as needed; then click **OK**.
12. Repeat steps 8-11 for each policy setting.
