### Task Summary

Actions you were required to perform:

- ✓ Run the Startup Repair option in Windows RE
- ✓ Make sure the computer boots into Windows

### Explanation

In this lab, your task is to evaluate and repair the computer. The computer is automatically running the Windows Recovery Environment, which indicates that a boot failure has occurred. Your best option is to try an automatic repair.

Complete this lab as follows:

1. Click the **power** button on the computer to turn it on.
2. Select **Advanced options**.
3. Select **Troubleshoot**.
4. Select **Advanced options**.
5. Select **Startup Repair**.
6. Allow the computer to boot into Windows.

On a real computer, the Startup Repair option may take an hour or more.
