✖ Create a folder called Reports

Explanation

In this lab, you explore the Windows Server 2012 user interface as follows:

1. Set a minimum password length as follows:
    a. In Server Manager, select **Tools** to view the available administrative tools.
    b. Select **Local Security Policy**.
    c. Expand **Account Policies**.
    d. Select **Password Policy**.
    e. In the center pane, right-click the **Minimum password length** and select **Properties**.
    f. Enter **10** as the minimum password length; then click **OK**.
    g. Close the Local Security Policy console.

2. Set the Application Identity service as follows:
    a. Move the mouse to the lower left-hand corner and select **Start** when it appears.
    b. Right-click inside the **Start** window and select **All apps**.
    c. Select **Services**.
    d. Right-click **Application Identity** and select **Properties**.
    e. Under Startup type, select **Automatic** from the drop-down list.
    f. Select **Start** to start the service.
    g. Click **OK** to close the Properties dialog.
    h. Close the Services console.

3. Remove Administrative Tools as follows:
    a. Move the mouse to the lower left-hand corner and select **Start** when it appears.
    b. Right-click inside the **Start** window and select **All apps**.
    c. Notice that **Administrative Tools** is listed on the desktop.
    d. Move the mouse to the lower right-hand corner to activate the Charms menu.
    e. Select **Settings**.
    f. Select **Tiles**.
    g. Set **Show administrative tools** to **No**. Administrative tools is removed from the All Apps window, but remains on the Desktop.
    h. Click outside of the Tiles dialog to close it.

4. Modify the default gateway address as follows:
    a. From the top left, select **Desktop**.
    b. In the lower right-hand corner, right-click the **Network** icon and select **Open Network and Sharing Center**.
    c. On the left, select **Change adapter settings**.
    d. Right-click **Ethernet** and select **Properties**.
    e. Select **Internet Protocol Version 4 (TCP/IPv4)**.
    f. Select **Properties**.
    g. Change the default gateway to **192.168.0.5**.
    h. Click **OK**.
    i. Click **Close**.
    j. Close Network Connections.

5. Ping the gateway as follows:
   a. Move the mouse to the lower left-hand corner and right-click **Start** when it appears.
   b. Select **Command Prompt**.
   c. Type **ipconfig /all** and press **Enter**. The Gateway server is 192.168.0.5.
   d. Type **ping 192.168.0.5** and press **Enter** to ping the gateway. The gateway should reply to the ping.
   e. Close the Command Prompt window.

6. Enable Remote Desktop as follows:
   a. Move the mouse to the lower right-hand corner to activate the Charms menu from the Desktop.
   b. Select **Settings**.
   c. Select **Control Panel**.
   d. Select **System and Security**.
   e. Select **System**.
   f. From the left, select **Remote settings**.
   g. Select **Allow connections from computers running any version of Remote Desktop (less secure)**.
   h. Click **OK**.
   i. Close the Control Panel.

7. Create a new user as follows:
   a. Move the mouse to the lower left-hand corner, right-click **Start** and select **Computer Management**.
   b. Expand **Local Users and Groups**.
   c. Select **Users**.
   d. Right-click inside the *center pane* and select **New User**.
   e. In the User Name field, enter **mbarnes**.
   f. In the Full name field, enter **Mary Barnes**.
   g. In the Password field, enter the **1234abcd!@#$** and then confirm the password.
   h. Click **Create**.
   i. Click **Close**.
   j. Close Computer Management.
