Task Summary

Actions you were required to perform:
   ✔ Update the BIOS on the Office1 computer

Explanation

In this lab, your task is to complete the following:

- Restart the computer and enter the BIOS. Which version of BIOS is currently running?
- Use the biosupdater.exe program at the root of C: to update the BIOS.
- Restart the computer and enter the BIOS. Which version of BIOS is running now?

Complete this lab as follows:

1. Check the current BIOS version as follows:
   a. Select **Start**.
   b. Select **Power**.
   c. Select **Restart**.
   d. As the computer restarts, press **F2** to enter the BIOS.
   e. On the System Information page, make sure the BIOS version is **1610**.
   f. Click **Exit** to continue to boot the computer.

2. Update the BIOS firmware as follows:
   a. On the taskbar, open **File Explorer**.
   b. Maximize the window for easier viewing.
   c. In the left pane, expand **This PC**.
   d. Select **System (C):**.
   e. Double-click **biosupdater.exe**.
   f. Click **Next** to update the BIOS version.
   g. After the BIOS is successfully updated, click **Close**.

   Try turning the computer off while the firmware update is in progress and see what happens to the computer.

3. Check the new BIOS version as follows:
   a. Select **Start**.
   b. Select **Power**.
   c. Select **Restart**.
   d. As the computer restarts, press **F2** to enter the BIOS.
   e. On the System Information page, make sure the BIOS version is **1724**.
   f. Click **Exit** to continue to boot the computer.
