✔ Set Erase Data to after 10 failed password attempts.

Explanation

In this lab, your task is to complete the following:

- Set a secure passcode on the iPad:
    - Require a passcode: **After 5 minutes**
    - New passcode: **KeepOutOfMyPad**
- Configure the iPad to erase data after 10 failed passcode attempts.

Complete this lab as follows:

1. Set a secure Passcode on the iPad as follows:
    a. Select **Settings**.
    b. From the left menu, select **Touch ID & Passcode**.
    c. Enter **1542** for the passcode.
    d. Select **Require Passcode**
    e. Select **After 5 minutes**.
    f. At the top, select **Passcode Lock**.
    g. Next to Simple Passcode, click the **switch** to turn off simple passcodes.
    h. Enter **1542** for the passcode.
    i. Enter **KeepOutOfMyPad** as the new passcode.
    j. Select **Next**.
    k. Enter **KeepOutOfMyPad** to re-enter the new passcode.
    l. Click **Done**.
2. Configure the iPad to Erase Data after 10 failed passcode attempts as follows:
    a. On the Touch ID & Passcode page next to Erase Data, click the **switch** to enable Erase Data.
    b. Click **Enable**.
