Task Summary

✖ Create the Desktop Admins group

✖ Configure the Restricted Group

Explanation

In this lab, you complete the following tasks on CorpDC:

- Create a global security group named Desktop Admins in the Admins OU. Members of the group will be added later.
- Configure a restricted group policy in the WorkstationGPO object that adds the domain Desktop Admins group to the local Administrators group on all workstations.

Complete this lab as follows:

1. Create a group as follows:
   a. From Hyper-V Manager, select **CORPSERVER**.
   b. Right-click **CorpDC** and select **Connect**.
   c. From Server Manager, select **Tools** > **Active Directory Users and Computers**.
   d. Browse the Active Directory structure to the appropriate *OU*.
   e. Right-click the *OU* and select **New** > **Group**.
   f. In the Group name field, enter the *name* of the group (a pre-Windows 2000 group name will be created automatically, but can be changed).
   g. Select a *group scope*.
   h. Select a *group type*; then click **OK**.
   i. Close Active Directory Users and Computers.

2. Create a restricted group as follows:
   a. From Server Manager, select **Tools** > **Group Policy Management**.
   b. Expand **Forest: CorpNet.com** > **Domains** > **CorpNet.com** > **Group Policy Objects**.
   c. Right-click **WorkstationGPO** and select **Edit**.
   d. Under Computer Configuration, expand **Policies** > **Windows Settings** > **Security Settings**.
   e. Right-click **Restricted Groups** and select **Add Group**.
   f. Select **Browse**.
   g. In the Enter the object names to select field, enter **Desktop Admins**; then click **OK**.
   h. Click **OK**.
   i. Under This group is a member of, select **Add**.
   j. Enter **Administrators** (do not browse); then click **OK**.
   k. Click **OK**.
