Actions you were required to perform:
- ✖ Configure the dial-up phone number
- ✖ Use Dial-up My Work as the destination name
- ✖ Allow other users to use the connection
- ✖ Use ITS49 as the username
- ✖ Use ab18$ut as the password
- ✖ Configure the connection to remember the password

Explanation

In this lab, your task is to configure a dial-up connection to a workplace with the following settings:

- Telephone Number: **801-555-4321**
- Destination name (connection name): **Dial-up My Work**
- Allow other users to use the connection
- Username: **ITS49**
- Password: **ab18$ut**
- Remember this password: **Enabled**

Complete this lab as follows:

1. In the notification area, right-click the **Network** icon and select **Open Network & Internet settings**.
2. Maximize the window for easier viewing.
3. Select **Network and Sharing Center**.
4. Select **Set up a new connection or network** to create the dial-up connection.
5. Select **Connect to a workplace**.
6. Click **Next**.
7. Select **Dial directly**.
8. In the Telephone number field, enter **801-555-4321**.
9. In the Destination name field, enter **Dial-up My Work**.
10. Select **Allow other people to use this connection**.
11. Click **Next**.
12. In the User name field, enter **ITS49** as the username.
13. In the Password field, enter **ab18$ut** as the password.
14. Select **Remember this password**.
15. Click **Next**.
16. Click **Close**.
