Actions you were required to perform:

  ✔ Connect the 802.11n wireless adapterHide Details

> ➕ Connect the 802.11n wireless adapter to the Support computer
>
> ➕ Do not connect other wireless adapters

  ✔ Connect to the corporate wireless network using the correct adapter

Explanation

In this lab, your task is to complete the following:

- Select the USB wireless adapter that meets the requirements and connect it to the computer.
- When connected, switch to the operating system and connect to a wireless corporate network using the following settings:
    - SSID: **CorpNet**
    - Password: **@CorpNetWeRSecure!&**
    - Allow the computer to be discoverable on your network.

Complete this lab as follows:

1. Select the USB wireless adapter as follows:
    - a. Above the computer, select **Back** to switch to the back view of the computer.
    - b. On the Shelf, expand **Wireless Adapters**.
    - c. Read the description for each device and identify the one that meets the requirements.
    - d. Drag the *device* from the Shelf to a USB port on the computer.

2. Connect to a wireless corporate network as follows:
    - a. On the monitor, select **Click to view Windows 10**.
    - b. In the notification area, select the **Network** icon.
    - c. Select **CorpNet**.
    - d. Select **Connect**.
    - e. Enter **@CorpNetWeRSecure!&** as the network security key.
    - f. Select **Next**.
    - g. Select **Yes**.
