Task Summary

✔ Add the File Server role to the cluster   Hide Details

> ➕ Server role: File Server
>
> ➕ Server type: Scale-out server for application data
>
> ➕ Client Access Point name: CorpApps

Explanation

In this lab, you add a role to CorpCluster using the following settings:

- Server role: **File Server**
- Server type: **Scale-Out File Server**
- Client Access Point name: **CorpApps**

Following are steps that an expert might take to perform the tasks in this lab:

1. From Server Manager, select **Tools** > **Failover Cluster Manager**.
2. Expand the *cluster node* and select **Roles**.
3. Right-click **Roles** and select **Configure Role**.
4. Click **Next** to begin the wizard.
5. Select the *file server role*; then click **Next**.
6. Select the *file server type*; then click **Next**.
7. Enter the *client access point name*; then click **Next**.
8. Click **Next** to confirm.
9. Click **Finish**.
