Your Performance

Your Score: 0 of 5 (0%)   Pass Status: Not Passed

Elapsed Time: 2 minutes 53 seconds   Required Score: 100%

Task Summary

Actions you were required to perform:

   ✖ Assign three disks to the storage pool

   ✖ Create a storage pool named ExtraSpace

   ✖ Assign the storage space to drive S:

   ✖ Configure the storage space to use parity

   ✖ Set the size of the storage space to 2.3 TB

Explanation

In this lab, your task is to complete the following:

- Assign three of the 800 GB drives to a storage pool.
- Create a storage space named **ExtraSpace** from the storage pool.
- Assign drive letter **S:** to the storage space.
- Configure the storage space to use **Parity** for resiliency.
- Set the storage to its maximum size.

Complete this lab as follows:

1. On the computer, click the **power** button.
2. In the search field on the taskbar, enter **Storage Space**.
3. Under Best match, select **Manage Storage Spaces**.
4. Select **Create a new pool and storage space**.
5. Deselect one of the four disks.
6. Select **Create pool**.
7. In the Name field, enter **ExtraSpace** (with no spaces in the name).
8. In the Drive letter drop-down list, select **S:**.
9. In the Resiliency type drop-down list, select **Parity**.
10. In the Size field, enter **2.3** TB.
11. Select **Create storage space**.
