Task Summary

✖ Set the **Application Identity** service to Automatic

✖ Set the **Remote Registry** service to Disabled

✖ Set the **Routing and Remote Access** service to Disabled

✖ Set the **SSDP Discovery** service to Disabled

✖ Set the **UPnP Device Host** service to Disabled

Explanation

In this lab, you configure the Workstation GPO with the following settings:

Service	Setting
Application Identity	Automatic
Remote Registry	Disabled
Routing and Remote Access	Disabled
SSDP Discovery	Disabled
UPnP Device Host	Disabled

Complete this lab as follows:

1. From Server Manager, select **Tools** > **Group Policy Management**.
2. Expand **Forest: CorpNet.com** > **Domains** > **CorpNet.com** > **Group Policy Objects**.
3. Right-click **WorkstationGPO** and select **Edit**.
4. Under Computer Configuration, expand **Policies** > **Windows Settings** > **Security Settings**.
5. Select **System Services**.
6. In the right pane, double-click the *policy* you want to edit.
7. Select **Define this policy setting**.
8. Select the *policy setting*; then click **OK**.
9. Repeat steps 6–8 for each policy setting.
