Task Summary

Required Actions

 ✔ Application log cleared

 ✔ System log cleared

Explanation

In this lab, your task is to use Windows PowerShell (as Admin) to clear the following event logs:

- Use **get-eventlog** to view the available event logs.
- Use **clear-eventlog** to clear the Application and System logs.

Complete this lab as follows:

1. Right-click **Start** and select **Windows PowerShell (Admin)**.
2. Maximize the window for easier viewing.
3. At the prompt, type **Get-Eventlog -logname *** and press **Enter**.
   In the Entries column, notice the number of entries for the logs.
4. Type **Clear-Eventlog -logname Application** and press **Enter**.
5. Type **Clear-Eventlog -logname System** and press **Enter**.
6. Type **Get-Eventlog -logname *** and press **Enter**.
   The log entries for Application is zero. The log entries for System is one because another event occurred between
   the times you cleared the log and viewed the entry list.
