> ▬ Unlock the Susan account
> ▬ Remove Susan from the Administrators group

✖ Turn on the Windows Firewall feature for all profiles

✖ Remove the C:\\MyMusic folder share

Explanation

In this lab, you perform the following:

- Run a vulnerability scan for the Office2 workstation using the Security Evaluator feature on the taskbar.
- Remediate the vulnerabilities found in the vulnerability report on Office2:
    - Rename the Administrator account
    - Disable the Guest account
    - Set the password for the Mary account to expire
    - Enforce a strong password for the Mary account
    - Unlock the Susan account
    - Remove the Susan account from the Administrators group
    - Turn on Windows Firewall for all profiles
    - Remove the file share on the MyMusic folder

Complete this lab as follows:

1. Run a Security Evaluator report as follows:
    a. From the taskbar, open **Security Evaluator**.
    b. Next to Local Machine, select the **Target** icon to select a new target.
    c. Select **Workstation**.
    d. From the Workstation drop-down list, select **Office2** as the target.
    e. Click **OK**.
    f. Select the **Status refresh icon** to run the security evaluation.
    g. Review the results to determine which issues you need to resolve on Office2.
2. From the top menu, select **Floor 1**.
3. Select **Office2**.
4. On Office2, right-click **Start** and select **Computer Management**.
5. Expand **Local Users and Groups**.
6. Select **Users**.
7. Rename a user account as follows:
    a. Right-click **Administrator** and select **Rename**.

b. Enter a new *name* and press **Enter**.

8. Disable the Guest account as follows:
   a. Right-click **Guest** and select **Properties**.
   b. Select **Account is disabled**; then click **OK**.

9. Set a new password as follows:
   a. Right-click **Mary** and select **Set Password**.
   b. Select **Proceed**.
   c. Enter a new **password** (12 characters or more).
   d. Click **OK**.
   e. Confirm the new **password**; then click **OK**.
   f. Click **OK**.

   Ideally, you should have created a policy that requires passwords with 12 characters or more.

10. Set a password to expire as follows:
    a. Right-click **Mary** and select **Properties**.
    b. Deselect **Password never expires**.
    c. Select **User must change password at next logon**; then click **OK**.

11. Unlock a user account and remove the user from a group as follows:
    a. Right-click **Susan** and select **Properties**.
    b. Deselect **Account is locked out**; then click **Apply**.
    c. Select the **Member of** tab.
    d. Select the *group*.
    e. Select **Remove**.
    f. Click **OK**.

12. Enable Windows Firewall for all profiles as follows:
    a. Right-click **Start** and select **Control Panel**.
    b. Select **System and Security**.
    c. Select **Windows Firewall**.
    d. Select **Turn Windows Firewall on or off**.
    e. Under Domain network settings, select **Turn on Windows Firewall**.
    f. Under Private network settings, select **Turn on Windows Firewall**.
    g. Under Public network settings, select **Turn on Windows Firewall**.
    h. Click **OK**.

13. Remove a file share as follows:
    a. From the taskbar, open **File Explorer**.
    b. Browse to **C:\\MyMusic**.
    c. Right-click the *folder* and select **Properties**.
    d. Select the **Sharing** tab.
    e. Select **Advanced Sharing**.
    f. Deselect **Share this folder**.
    g. Click **OK**.
    h. Click **Close**.

14. Use the Security Evaluator feature to verify that all of the issues on the ITAdmin computer were resolved as follows:
    a. From the top menu, select **Floor 1**.
    b. Select **ITAdmin**.
    c. In Security Evaluator, select **Status refresh** to rerun the security evaluation.
    d. If you still see unresolved issues, select **Floor 1**, navigate to the Office2 workstation, and remediate any remaining issues.
