Task Summary

✔ Grant Everyone Allow Change share permissions

Explanation

The users' access problem occurs because effective permissions are the least restrictive of the NTFS or share permissions. Because the Everyone group has the Read share permission only, the Read permission is the effective permission for the shared folder.

Grant the Everyone group the Change share permission as follows:

1. From Hyper-V Manager, select **CORPSERVER**.
2. Maximize the window to view all virtual machines.
3. Right-click **CorpFiles12** and select **Connect**.
4. On the taskbar, open **File Explorer**.
5. Navigate to the *shared folder*.
6. Right-click the *shared folder* and select **Properties**.
7. Select the **Sharing** tab.
8. Select **Advanced Sharing**.
9. Select **Permissions**.
10. Under Group or users names, make sure **Everyone** is highlighted.
11. Under Allow, select **Change**; then click **OK**.
12. Click **OK** to save the changes.
