Explanation

Configure the security features on your wireless controller as follows:

1. Change the admin username and password as follows:
   a. From the taskbar, open **Internet Explorer**.
   b. Maximize Internet Explorer.
   c. Type **192.168.0.6** and press **Enter**.
   d. Enter the *username*.
   e. Enter the *password*.
   f. Select **Login**.
   g. From the top, select the **Administer** tab.
   h. Make sure **Authenticate using the admin name and password** is selected.
   i. In the Admin Name field, enter the new *username*.
   j. In the Current Password field, enter the current *password*.
   k. In the New Password field, enter the new *password*.
   l. In the Confirm New Password field, enter the new *password*.
   m. On the right, select **Apply**.

2. Enable MAC address filtering as follows:
   a. From the top, select the **Configure** tab.
   b. From the left menu, select **Access Control**.
   c. Expand **L2-L7 Access Control**.
   d. Under L2/MAC address Access Control, select **Create New**.
   e. In the Name field, enter **Allowed Devices**.
   f. Under Restriction, make sure **Only allow all stations listed below** is selected.
   g. Enter a *MAC address*.
   h. Select **Create New**.
   i. Repeat step 2g–2h for each MAC address you would like to add to the ACL.
   j. Click **OK**.

3. Configure access controls as follows:
   a. In Access Control, expand **Device Access Policy**.
   b. Select **Create New**.
   c. In the Name field, enter **NoGames**.
   d. Select **Create New**.
   e. In the Description field, enter **Games**.
   f. In the OS/Type drop-down list, select **Gaming**.
   g. In the Type field, select **Deny**.
   h. Under Uplink, make sure **Disabled** is selected.
   i. Under Downlink, make sure **Disabled** is selected.
   j. Click **Save**.
   k. Click **OK**.
